

“ GANGA UTSAV, 2021”

The National Mission for Clean Ganga (NMCG), Ministry of Jal Shakti has been celebrating "Ganga Utsav" every year on 4th November with an aim to establish a strong public-river connect specially with Ganga and its ecology. NMCG organised "Ganga-Utsav-A River Festival" from 1st to 3rd November, 2021 at Delhi with similar events being held at 75 stations within the Ganga Basin and across major rivers in the country. The students and staff members of N.C.Jindal Public School, Punjabi Bagh, New Delhi also took part in various activities keeping the theme of conservation of water as the centre of activities. The students engaged themselves in the following activities:

1. Slogan Writing on “ Save Our Rivers”.
2. Posters on river Ganga.
3. Debate Competition on the topic “ Human beings are solely responsible for pollution of rivers”.
4. Poems Writing on “ Ganga”.
5. Quizzes on the topic of “River Ganga”.
6. Drawings on “Rivers of India”.

DRAWINGS ON RIVERS OF INDIA

Ganga

Oh ganga you are the one,
Who flies fearlessly,
From Barisal division to Uttarakhand.
Every year, every season,
I see you flying in every division,
Any time, any day,
I see you working continuously.
Oh ganga,
You are the one,
Who carries fishes,
From Mrigal carp to Ganges shark,
You don't let anyone to get spoil,
You take care of everyone,
Whether its living or dead.
Now we know that you work hard,
You don't fly alone,
You fly with your millions of clones,
You let them live inside you,
You are same as lord Vishnu.
Oh ganga,
You are the one,
Your purity is just awesome,
You are pure and the one who steps inside you,
Is more than pure,
Any problem and you are the cure,
You are the best for Vedic rituals for after death,
There is something in you.

INDRANI SINGH

7A

गंगा मैया का बचाओ नाम , इसे निर्मल बनाने का करे काम ।

गंगा देश का मान बढ़ाती , दुनिया में हमे पहचान दिलाती ।

नदियों की यह रानी है , कल्याण करने वाला पानी है ।

नदी का न करो अपमान , यह तो है हम सब का मान ।

गंगा नदी जहा भी जाए ,

कण कण को खुशहाल बनाए ।

निष्ठा कादयान

HOW HUMAN BEINGS ARE RESPONSIBLE FOR POLLUTING RIVERS

Humans are the main cause of water pollution, which triggered in many ways:-

- Human dumps the industrial waste in water bodies which pollute them.
- Harmful chemicals, bacteria & pathogens can be found in sewage & wastewater even when it has been treated which is released into rivers.
- In order to protect crop from insects farmers use chemical & pesticides. The chemicals seep into ground water & when it rains it get mix with rain water which later flows into river.

So there are numerous ways through which human pollute water bodies.

Sidhi Gang

Date: _____

Natural sources of water pollution

- * floods are the natural source of water pollution
- * Algae:- They are responsible for the production of all kinds of water bodies and are involved in water pollution in many ways.
- * volcanoes:- When volcanic ash clouds move over water bodies, then hydrogen fluoride can be precipitated out of the cloud and into the water, becomes contaminated with toxic.
- * earthquakes:- When the intense shaking of an earthquake occurs, an influx of sediments from the surrounding area can impact water quality for surface and ground water system.
- * tsunami:- The ~~tsunami~~ tsunami destroyed several water supply systems across the region and make the water unfit for human consumption.

Debate on save rivers 4/1/21

Pro:- Rivers are very important as we get food and fresh water to drink.

Con:- The trees give food and the rain is going into to drink then why we should save rivers.

Pro:- We need water in our day today life activities so we should reduce wastage and try to reuse water as much as possible.

Con:- The water we use is going to drains and drains are connected to river and is purified by the water plants and it is released.

Pro:- If we conserve water we will be able to have enough water for our farms.

Con:- The rain gives enough water to the farms so why we have to conserve.

Pro:- Rivers help aquatic animal to live.

Made by Anshika, Anvika, Anvika

Debate on save river 2/1/21

Pro:- After using rivers flow the aquatic animals go to sea.

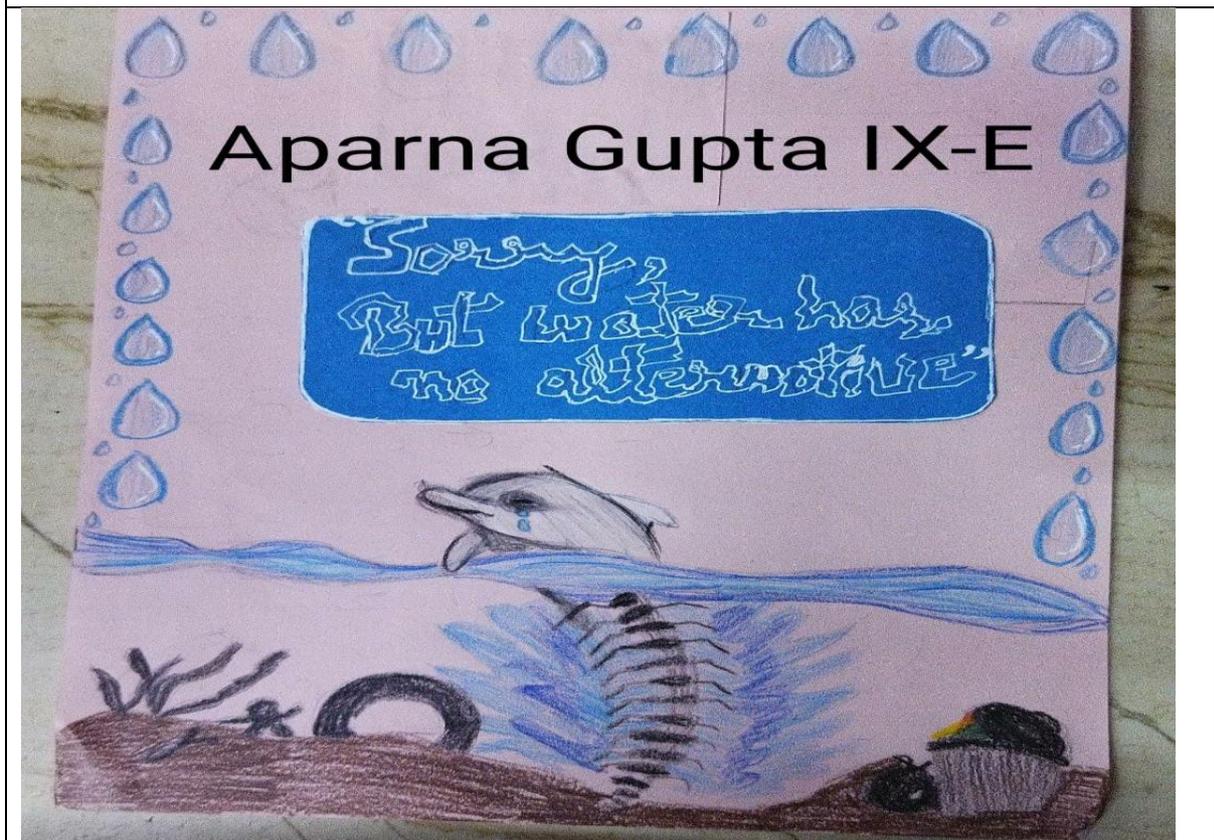

Con:- Conservation of water will also ensure a proper balance of life on the planet earth.

Pro:- Conservation is good but in standing water the mosquitoes will come.

Con:- If we save river, river will save us.

Made by Anshika, Anvika
